Jeff Smics & the Staff of Smics and Associates

I want to take a minute to personally thank you, Jeff, for the work that you and your team did for us at Calvin Church. After considering the firms available for our project our Council quickly and unanimously decided that you were our only choice.

I appreciated your combination of technical skills and artistic abilities. You were able to blend the complexities of the materials and unique structure of our original facility into an addition that looks as if it were always here. At our Grand Opening I heard from many people that our addition doesn't look like an addition – this is a great compliment to what you accomplished. Your knowledge of the specific regulations and building codes governing churches allowed us to save a great deal of money. You are truly very skilled and gifted at what you do.

In addition to this, your passion for God's Church and your thorough understanding of how churches reach a consensus on critical decisions was a great benefit to us through each of the phases of the project. You helped us discern the difference between our needs and our wants and then helped us prioritize our needs. You gave us enough options to allow a strong sense of ownership over the project without confusing us or hindering us with too many variables. Your experience in similar projects allowed you to coordinate the work of the contractor, foreman, sub-contractors, and various committees of the church. Our project was completed ahead of schedule and under budget because you produced an exceptional design and coordinated the various parties involved in a very productive manner.

Your personal integrity and commitment to the people involved in the project also had a major impact on the confidence we developed that this was the right project at the right time. We have often marveled at how God could accomplish so much in just a few months. You have allowed us once again to experience His great ability to provide for the needs of His Church.

If future prospective clients or churches wish to discuss your qualifications or abilities with someone from a previous project please encourage them to contact me and tour our facility if this would help them in their decision.

In Him

Robert A. Sizemore
